Summary

Computer Engineering graduate with a strong interest in DevOps and cloud computing. Familiar with CI/CD pipelines using Jenkins, Docker, and basic scripting concepts. Knowledge of AWS services and cloud infrastructure fundamentals. Comfortable working with Linux, GitHub, and MySQL. Good at understanding problems, learning new technologies, and improving system processes. Seeking an opportunity to start a career in a growth-oriented environment and build practical skills.

Education

Adsul Technical Campus, Chas, Ahilyanagar, Maharashtra

June 2022 – June 2025

Bachelor of Engineering in Computer Engineering — CGPA: 7.06

Technologies

Languages: Shell Scripting, MySQL, Python

Technologies and Frameworks: MySQL, Docker, GitHub, Jenkins

Operating System: Linux, Windows

AWS Cloud Services: EC2, EBS, EFS, S3, VPC, Auto scaling, AMI, LB and Cloud Front

Projects

Yoga Pose Assessment Method for Pose Detection Using deep learning

Tech Stack: Python, OpenPose, CNN, LSTM, Deep Learning, Computer Vision

- Built a real-time yoga pose detection system using OpenPose and CNN.
- Provided accuracy scores and posture feedback to support home practice.

AWS Automated Web Infrastructure with High Availability Monitoring

Tech Stack: AWS (EC2, VPC, ELB, CloudWatch, SNS), Bash, Apache, Linux

- Automated static website deployment on AWS EC2 with ELB for high availability, CloudWatch monitoring, and SNS alerts.
- Implemented secure VPC architecture and IaC with Bash scripting, reducing manual effort by 80.

Automated Webpage Deployment by CI/CD Pipeline using Jenkins and Git with Webhook

Tech Stack: Jenkins, GitHub, Webhook, AWS EC2, Linux

- Automated static website deployment on AWS EC2 by integrating GitHub with Jenkins via webhooks for CI/CD.
- Configured Jenkins master-slave architecture with multiple nodes, ensuring distributed builds and faster deployments.

Knowledge About

- **Linux:** User management, permissions/ACLs, file operations, YUM/RPM, crontab, compression, MySQL, Bash scripting.
- **AWS Cloud:** EC2, AMIs, EBS/EFS/S3, IAM, Load Balancer, Auto Scaling, CloudWatch, CloudTrail.
- **Docker:** Containers, images, Dockerfiles, Docker Hub, Docker Compose.
- **Git:** Repositories, branching/merging, conflict resolution, key Git commands.
- **Jenkins:** Jobs, Git integration (Poll SCM/webhooks), master-slave setup, pipelines, parallel/sequential builds.

Achievements and Certifications

- Completed AWS and DevOps from Irizpro Inspire Excellence
